

PRESS RELEASE

Ressources Appalaches Fully Permitted for Gold Production

Rimouski, Quebec, Canada – November 27, 2013 – Ressources Appalaches (APP - TSXV and OU3 - FWB) is very pleased to report that it is fully permitted to proceed with gold production at its 100% owned Dufferin Mine project in Nova Scotia. Today the Company received the final permit, the Industrial Approval, from the provincial authorities.

Alain Hupe President and CEO of Ressources Appalaches reports: “The issuance of the Industrial Approval has an enormous importance, allowing Ressources Appalaches to go from an Exploration Company to be a Gold Producer Company in a short period of time”

The receipt of the Industrial Approval along with the technical due diligence completes the most substantial conditions precedent for the funding of US\$7.5 million under Ressources Appalaches’ current gold prepay facility. The lender’s technical team reported last month that it was satisfied with Ressources Appalaches’ Dufferin Mine gold mine plan documents (mine report, mine plan, surface and underground electrical installation plan, ground control procedures and ventilation plan) economic model, operating cost estimates, and capital cost estimates (see press release of October 30, 2013).

Funding Conditions Precedent are nearing Completion

The Company is working to complete all legal conditions precedent required to be satisfied in order to release the remaining US\$7.5 million to Ressources Appalaches. The US\$7.5 million advance is expected to provide the required funds to complete the refurbishment and re-launch gold production at the Dufferin Mine (see press release of May 8, 2013).

The signing of the loan documents and advance of funds is expected to occur shortly. Start of commissioning is projected 4 months after the receipt of funds, with another 4 months required for initial mining and milling ramp-up of operations to steady state production.

Final Recruitment Process

Over the course of the past few weeks the Company has commenced the final selection and hiring process for the remaining approximately 54 positions to be filled in order to resume gold production at its Dufferin Mine. To date, the Company has received more than 950 applications for the following positions:

- Mine Technicians/Junior Mining Engineers
- Underground Boss
- Senior Assayer
- Underground Miners
- Electricians
- Site Services Technicians
- Administrative Assistants
- Mill Superintendent
- Millwrights / Trades Mechanics
- Process Boss & Process Operators
- Assay Lab Staff
- Underground Mechanic
- Security Personnel
- Finance Clerks

The sizeable number of applicants will enable the Company to continue its very competitive selection process. This progression will increase the opportunities of hiring the most qualified applicants to join the Dufferin Mine team

Webcast

The company will host a conference call and webcast on Friday, November 29, 2013 at 11:00 a.m. Eastern time to discuss the details concerning the Industrial Approval permitting, the second tranche of the Loan and provide a development update.
