

## PRESS RELEASE

### Underground drilling started at the Dufferin Mine

**Rimouski, Québec, Canada – April 9, 2014** – Ressources Appalaches (APP - TSXV and OU3 - FWB) is pleased to announce the start of underground drilling program at its Dufferin Mine in Nova Scotia. The holes will be drilled from the deepest level of the mine to outline mineral resources in Veins 4 through 6 beneath the previously mined zone up to 200 m at depth and to optimize future development of the mine. The existing system of tunnels provides access for mining of the first three veins of the deposit's veins.

"As planned, we are now just a few weeks away from the start-up of production. We are hiring new employees, doing underground development and completing the facilities at the mill to start gold production in April. We are proud of the professionalism and dedication exhibit by our team" notes Mr. Douglas Keating, the mine's General Manager, and Mr. Alain Hupé, the President and CEO of Ressources Appalaches.

### About Ressources Appalaches

Since it was created in 1994, the goal of Ressources Appalaches has been to discover and develop deposits of base and precious metals in Canada with an expertise targeted towards the Appalachian geological formation in Québec and Nova Scotia. The Company is mainly focused on the exploration and development of the Dufferin Gold Mine in Nova Scotia.

Photos of the Dufferin Mine and its facilities are available on the Company's website at: [www.ressourcesappalaches.com](http://www.ressourcesappalaches.com).
